

TYCOON[®] XTend

XTended Safety & Stability

SAFETY & STABILITY WITHOUT COMPROMISE

In many cases, standard strapping technologies no longer live up to the increasing demands of heavy duty applications in the building, wood & timber, metal, and baling industries. By launching TYCOON® XTend, TEUFELBERGER introduces a strapping product into the market that offers enhanced functionality and high quality without compromising the safety and stability of packaging.

TYCOON® XTend – zero compromises!

XTended Tenacity

- ✓ Increased edge strength
- ✓ Split-free – improved splitting characteristics, even at lower ambient temperatures

XTended Shock Reserve

- ✓ The strap is capable of absorbing even extremely high shock loads
- ✓ Ideal combination of high strength and 16% elongation

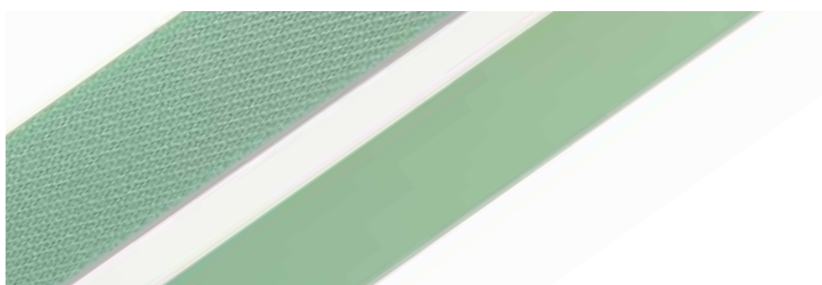

XTended Weldability

- ✓ Higher welding joint strength, even at lower ambient temperatures
- ✓ Fewer outliers/drop-outs

TYCOON® XTend – better performance with identical dimensions!

The upgraded production technology, an improved raw material process, and, most of all, a new recipe including a **patented additive** form the basis for the new generation of TYCOON® XTend strapping products. A leap in performance in our new green.

What is TYCOON® XTend best suited for?

Demanding heavy duty applications

- ✓ Typical fields of use: Wood & timber, building, metal, and baling industry
- ✓ As well as for all other applications where heavy goods need to be transported safely

Your benefit:

- ✓ Transporting goods in a compact and safe manner, without being damaged

Steel strap replacement

- ✓ Specially developed & improved heavy duty strap profile
- ✓ Complete portfolio of 16-32mm (5/8-1 1/4") straps

Your benefit:

- ✓ Reliable steel strap replacement with a clear cost advantage

Packaging optimization

- ✓ Use of less strapping per package/pallet, with strap dimensions remaining the same - e.g.: 4 straps with a 25x1.0mm (1x0.040") XTend instead of 5 with a conventional 25x1.0mm (1x0.040")
- ✓ Enhanced performance allows the use of thinner straps - e.g.: 16x0.9mm (5/8x0.035") XTend instead of a conventional 16x1.0mm (5/8x0.040")

Your benefit:

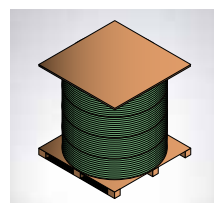

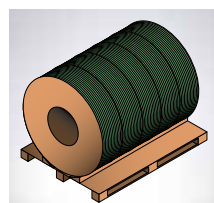

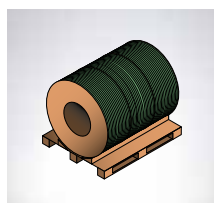

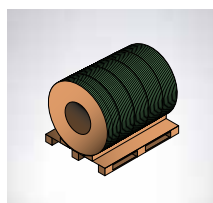

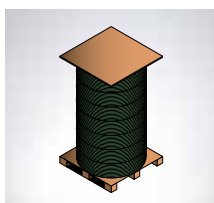

- ✓ Packaging optimization without any compromise in the safety and stability of your packaging, paired with a clear cost advantage

TYCOON® XTend – product portfolio

Width	Thickness	Breaking strength	Surface	Core
16–32mm	0.8–1.5mm	500–1,800kg	smooth/embossed	406 x 150/190/250/300mm
5/8–1 1/4"	0.030–0.060"	1,100–4,000lbs	smooth/embossed	16 x 6/7.5/10/12"
