OUR FULL RANGE OF ROPES FOR THE EQUINE MARKET

# TRADITION MEETS INNOVATION

**Tradition meets innovation for quality tack products that are long wearing and look great.**

Recommended by top clinicians, TEUFELBERGER offers a full range of premium quality products for the equine enthusiast, including an extensive assortment of ropes for halters, bridles, lead lines, and other tack.

## 3-STRAND SPUN NYLON

**3-strand spun nylon, a firm lay twisted rope** with spun/staple nylon, has better grip than monofilament nylon ropes and the fuzzy feel of cotton with the strength and durability of nylon.

3-strand spun nylon is a popular choice for lead lines.

- Available in both 9/16" and 5/8"

## 12-STRAND SPUN NYLON

**12-strand spun nylon** is a 5/8" diameter hollow braid. The spun nylon is soft on the hands and gives the rope its cottony feel and appearance. 12-strand spun nylon, when spliced with an eye in one end and a turk's head knot or popper on the other end, makes a perfect lead line.

- Available in white only

## MEGABRAID II

**Megabraid II is a unique 12-strand single braid rope** where each of the 12-strands is actually a braided cord. The result is a very pliable superb-handling line that is very abrasion resistant, stays round and firm and will not flatten out. It is a good choice for lunge lines because it will not hockle or fall out of lay like a 3-strand rope.

- Available in black or white in 1/2", 9/16", and 5/8"

Black

## MULTILINE

**Multiline II is a 3-strand composite rope.** Each of the 3 strands is comprised of a small core of fibrillated polypropylene surrounded by spun and filament polyester. The spun polyester gives the rope its characteristic soft cottony feel. The polypropylene cores keep each strand firm and round, but significantly lowers the weight. Multiline II is also ideally suited for pack rope and making hobbles.

- Available in 1/2" white only

White

### KM-III

**KM-III is a kernmantle construction** consisting of bundles of plied nylon core fibers surrounded by a jacket of durable, UV-resistant polyester. KM-III is an ideal choice for extra firm reins, and is perfect for show ring mecates because its stiff design reduces movement of the reins during competition. Mecates made from KM-III are also very popular with competitors using bosals.

- Available in black in 7/16", 1/2", and 5/8"

Black

### WAXED REIN ROPE

**Waxed Rein Rope is a very firm, round 1/2" diameter 16-strand kernmantle rope.** Each of the 16 cover strands is coated in a wax that gives Waxed Rein Rope its characteristic weight and feel with just enough texture for grip. Splice a water strap on one end and a leather popper on the other for a durable lunge line. With a popper on one end and a pineapple knot on the other, Waxed Rein Rope is a great Mecate for snaffle bits, and hackamores/bosals. Waxed Rein Rope is also the perfect rein rope. Splice water straps in each end for roping reins or, for split reins, simply splice a pair of Waxed Rein Ropes with a water strap on one end and a popper on the other end.

- Available in White and Black

### STA-SET

**Our Sta-Set is a premium all-polyester yacht braid** designed to hold up to UV rays and saline environments. This means no fading from exposure to the sun or degradation, rotting, or fraying from sweat absorption. Leads, reins, and halters made with Sta-Set are machine washable for seasons of use. Sta-Set is a firm, flexible rope that will not stretch or shrink. Its firm round cross section gives good pressure under resistance, but is still soft enough to provide comfort instantly once the pressure is released. Unlike other double braid ropes, Sta-Set has 3 twisted yarns per strand for a smoother rugged jacket that is durable, yet stays supple and pliable for easy knotting. Additionally, Sta-Set is available in 11 colors making it easy to produce leads, reins, and halters that match.

- Available from 3/16" – 3/4"
